CYBER-SOHO · OCT 28, 2026

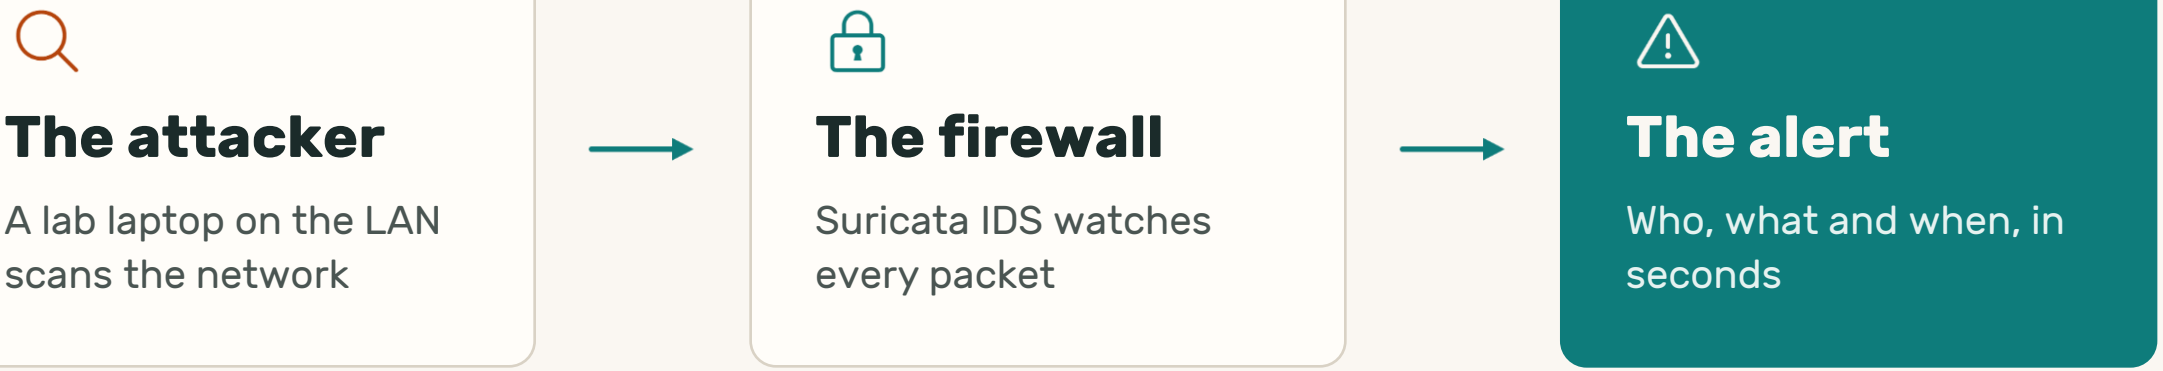

This has handles. It’s also a data center.

A firewall, a private cloud and threat detection, built in a 3D-printed rack from old and refurbished hardware.

From the Industry to the Classroom

LIVE DEMO

Watch the firewall catch a scan

Simulated attack inside an isolated lab • lab-owned devices only

THE PLAN

From a firewall to a private AI lab

TODAY

Firewall and switches

Network zones, security Pis, the 3D-printed rack

THIS TERM

Storage server

Four drives in RAID 5 that survive a dead disk

JANUARY

Private cloud

Two 64 GB hosts, a SIEM and battery backup

2027 · YOUR PROJECT

Local AI node

Git, coding tools and a Qwen model that runs right here

Planned build, subject to funding

WHO WANTS THE NEXT BAY?

The next bay is empty. Come fill it.

Scan the code, then come up and pick it up. It has handles for a reason.
